## DETAILED ACTION

### *Claim Objections*

The numbering of claims is not in accordance with 37 CFR 1.126, because claim 8 is missing. Misnumbered claims 9-26 been renumbered 8-25, respectively. Attached please find a copy of the claims as newly renumbered. The claims are referred to below in their re-numbered format.

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a method of enrichment of natural antisense messenger RNA (mRNA), classified in class 435, subclass 6.
- II. Claims 9-26, drawn to a method for detection of differential expression of natural antisense messenger RNA (mRNA), classified in class 435, subclass 6.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions contain different steps and starting reagents. For example, the invention of Group I utilizes cDNA generated from a single population of RNA molecules, while the invention fo Group II utilizes two populations. Furthermore, Group II requires the use of a microarray for the detection of labeled RNA molecules, which is not required in Group I. Thus, the two Groups have different modes of operation, and although some steps of Group I are shared in Group II, the methods themselves are not disclosed as usable together, and are therefore considered

Art Unit: 1635

patentably distinct. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, is non-overlapping and not co-extensive, particularly as they relate to the distinct method steps as set forth above, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
